

O C E A N SCOUT[®] TK

Marine Thermal Vision

NEW PRODUCT

The FLIR Ocean Scout TK is a marine thermal camera that extends your vision on the water, day or night, for greater awareness and safety. As a thermal imager, the Ocean Scout TK creates images based on heat, not visible light. Vessels, watercraft, buoys, and other obstacles give off heat and appear clearly in all lighting conditions – from pitch darkness to blinding sun glare. At a breakthrough price of \$599, the Ocean Scout TK is an affordable way to enjoy your time on the water and explore your world with thermal vision.

The World's Sixth Sense[®]

GREATER AWARENESS ON THE WATER

Spot obstacles and objects up to 130 yards away

- See boats, buoys, and channel markers
- Identify landmarks like docks, inlets, and jetties
- Steer clear of rocks and floating debris
- Locate people and pets overboard

EXPLORE YOUR WORLD IN THE DARK

See heat, instead of light

- Store up to 1000 thermal snapshots
- Record thermal video
- Choose from multiple color palettes
- Spot marine mammals, or discover wildlife back on shore

GRAB AND GO SIMPLICITY

Starts up in seconds, no training required

- Pocket-sized, light-weight (6 oz. / 170 g)
- Ergonomic for one-handed operation
- Easy-to-use buttons
- Submersible (IP67) and built to withstand harsh marine environments
- 5-hour Rechargeable Li-Ion battery
